

# The Barony of Arn Hold's Moose Call

## Their Excellencies Missive

Greetings Arn Hold!

We would first like to share with those who were unable to attend Raptor War, the oath We made to the Populace during our Investiture. To us, this was a VERY important part of our ceremony. Let it be known to all present and passed by word and script that We Fernando and Syeira hereby make this oath to the Barony of Arn Hold. We will treat all within our borders equally with kindness, respect and honesty in all matters. We will serve in good faith and put the best interest of the Barony above our own or any individual member. We will endeavor to inspire all, to continue the legacy of excellence in the arts and sciences, show the known world the strength of our army, the deadliness of our archers, the accuracy of our thrown weapons, the agility of our equestrians and the finesse of our duelist. We will be your voice; We will be your champions to the Kingdom. All that has been stated We will hold and observe faithfully and without deception.

Now on to the next thing, FUN!! FUN, is what this is really all about. That is why we are all here participating in this wonderful hobby. Part of being in the SCA, is sharing that fun with others. Don't you think we need more people to come join our group, to learn, to teach and to help us with the work that makes the SCA fun for each of us? That is why we want everyone to think about what makes the SCA fun for you? How can you improve that? How can you show that? Now take that idea, build on it and.....Bring it to Museum Comes to Life!!!! We need the entire Barony to come and show off what we REALLY do and why it is so much fun.

## Seneschal's Missive

Greetings, Arn Hold:

**I**t takes a thousand details and dozens of people to throw a three day party for over a hundred people. Congratulations Arn Hold on creating a fun Raptor War. I have heard so many good comments from people throughout the Kingdom who attended. The site was beautiful, the Marshalled events well run, and the Assassin's tourney was in particular well received by all who participated or watched. Thanks to all who helped make this event happen.

Looking forward we have a number of upcoming demos and events. I encourage everyone in particular to participate in Museum Comes to Life demos at the end of September. This event brings in many new people who often become our newest members, friends and craftsmen.

Yours In Service,

**Lady Aelin**

Seneschal

## Chronicler's Corner

The Chronicler's office is sorely in need of articles, artwork, and help in the form of a deputy Chronicler for those times when my schedule simply overwhelms me. Prior experience is not needed, and the job is relatively simple. If you are interested, or know someone interested, please don't hesitate to contact me.

In Service,

**Earc**

## Reeve Report

Q2 for the Arn Hold books saw an increase in net worth as our pre-paid expenses resolved and we held a couple of events.

The Baronial net worth improved from \$6,396 to \$6,913, netting a loss for the YTD of just under \$400 as of July 1 (pre-Raptor War). Looking at the Baronial Budget for 2012, the projected income from events for Q1 & Q2 was budgeted to be \$550, while the actual income was \$758, so we are +\$208 on income. In contrast, we have spent 57% of the budgeted expenses so far this year, with known significant expenses of Website renewal (\$370) and 6 months Storage Unit (\$253) planned for.

Finally, the Baronial Guilds and sub-accounts are up slightly, they were \$1,653 at the end of Q1, and \$1,811 at the end of Q2.

In Service I remain,

**Baron Braden**

Reeve

# Random Carp That I Have Learned...

*A look at modern practices and their medieval sources*

By K. Braden von Sobernheim

Ancient Rome had standard metrics for everything, being the first civilization to really standardize units of length, volume (liquid & dry), weight, and time. Prior to the Empire, these were subject to local preferences. The Roman units of measurement were based on sets of twelve, rolling up in types: 12 *uncia* in a *pes* (12 inches in a foot), 12 *cyathus* in a *sextarius* (volume), and 12 *uncia* in a *libra* (12 ounces in a pound). There were (eventually) 12 months in the year, 12 *horae* morning to evening, and 3 four hour watches at night. Today, we buy eggs, arrows, donuts, and pick jurors by the dozen (12) and still use the units the Romans started. *Libra* (pound weight) was shortened to “lb” in everyday use... and now you know more random carp.
